

Mystery Island Landform Project

Imagine you discovered a new island no one has ever explored before. It does not exist on any map! You can name this island whatever you want and make its first official map and model.

Project:

- Design an island. It can be any shape you like.
- Make a map of your island on a piece of white construction paper.
- Your island must have a name.
- **SHOW** at least 4 LANDFORMS that are on your island. You may show more.
- Each landform must be labeled.
- Each landform must have a name.
- Have fun and be creative!

Choose from the following landforms you studied to show on your island or look up other* landforms to add to your island:

Mountain	Ocean	Hill	Valley	
Plain	Lake	Island	Peninsula	River
Desert	Waterfall	Volcano	Iceberg	

Use our class webpage to look up information about the landforms we have studied.

	Project Checklist
	Named my island and wrote it as a title
	Made a map of my island in a unique shape
	Made a map key and a compass rose
	Showed at least 4 different types of landforms on the map
	Named and labeled ALL landforms
	Showed each landform correctly
	Project is creative, colorful and neat
